[Does Java Work With Firefox](#)

**DOWNLOAD**

---

'about:plugins' does display the plugin version that I have installed I see you're running CentOS 4.. 5 and not CentOS 5 Maybe there is no CentOS 5 java plugin yet The installation instructions on Sun's site are clearly out of date.

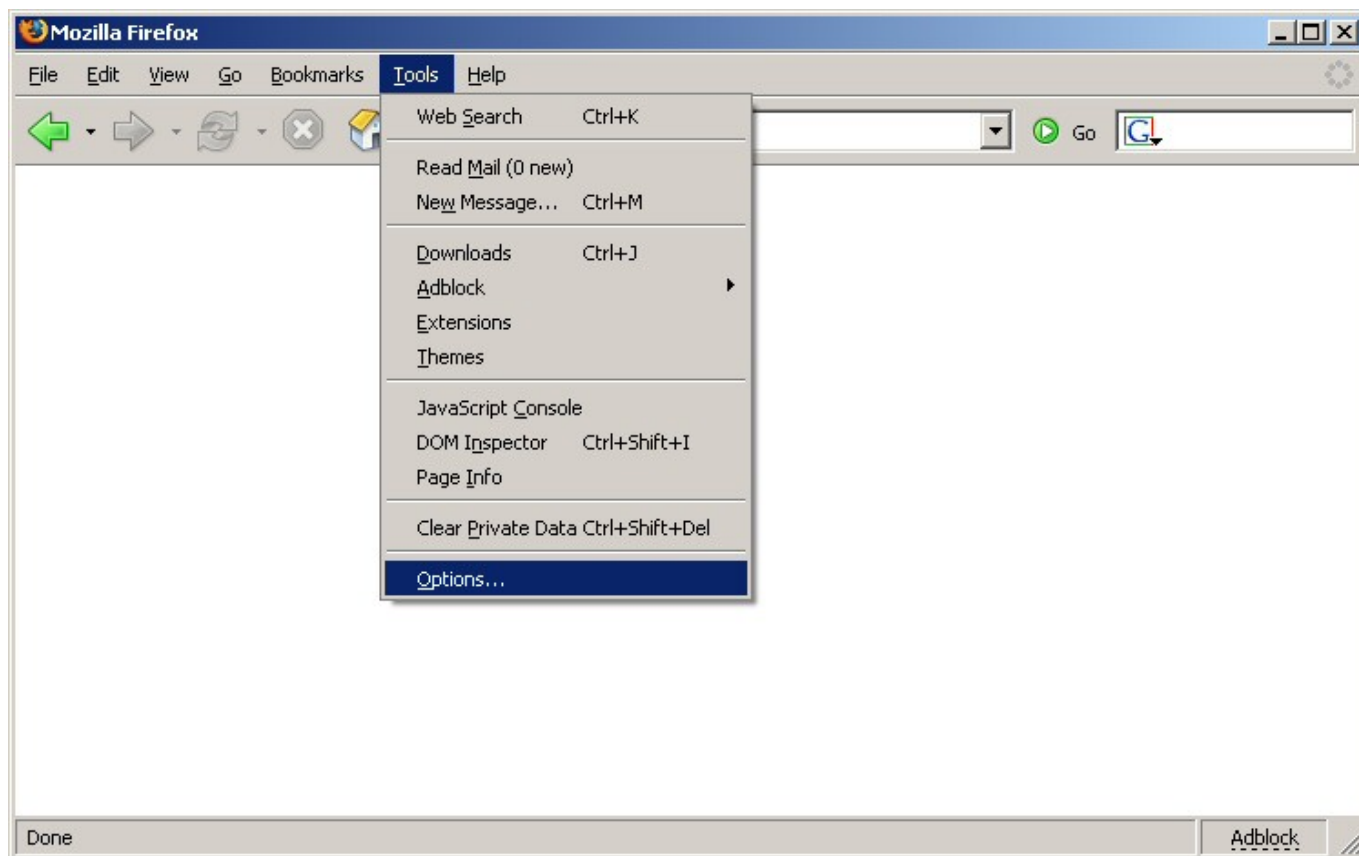

1. [does java work with firefox](#)

If you bring up firefox and put in the url 'about:plugins' does the java plugin show?[/quote] Yes.
